ADIGUN MOYINOLUWA DEBORAH

FRONTEND DEVELOPER

Lagos, Nigeria | moyinoluwaadigun390@gmail.com | github.com/DevMoyin17 | Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building and deploying responsive, scalable, and user-friendly web applications using React.js, Vue.js, and Tailwind CSS. Skilled in developing role-based access control (RBAC) systems, real-time dashboards, and API-driven interfaces. Experienced in writing clean, maintainable code, optimizing application performance, and improving page load times by up to 50% on recent projects. Comfortable working independently and within agile teams, collaborating with backend developers on API integration, conducting code reviews, and deploying applications. Passionate about creating intuitive user experiences, solving frontend challenges, and delivering high-quality web applications. Seeking opportunities to contribute to innovative projects as a Frontend Developer.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3
Frontend Frameworks & Libraries: React.js, Vue.js, React Hooks, Context API, React Router
UI Development & Styling: Tailwind CSS, Bootstrap, Responsive Web Design, Mobile-First Development, CSS Flexbox, CSS Grid, Cross-Browser Compatibility
State Management & Data Fetching: React Context API, TanStack Query (React Query), Fetch API, Axios, Async/Await
API Integration: RESTful APIs, JSON, API Integration, Error Handling, Loading States, Client-Server Communication
Authentication & Authorization: JWT Authentication, Role-Based Access Control (RBAC), Protected Routes, Route Guards, Conditional Rendering, Session Management
Performance Optimization: Code Splitting, Lazy Loading, React.memo, useMemo, useCallback, Component Reusability, Rendering Optimization
Development Tools & Deployment: Git, GitHub, Vercel, Postman, VS Code, npm, Chrome DevTools
Software Engineering Practices: Component-Based Architecture, Reusable UI Components, Clean Code, Code Reviews, Debugging, Version Control, Agile/Scrum, API Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer | De-Virtuosphere — Remote *Feb 2026 – Present*

- Developed and maintained responsive, scalable web applications using React.js, Next.js, and Tailwind CSS, delivering intuitive user interfaces across desktop and mobile devices.
- Built interactive dashboards and role-based interfaces for school management, student records, payments, attendance, and administrative operations.
- Integrated RESTful APIs to enable dynamic data rendering, authentication, and seamless communication between frontend applications and backend services.
- Implemented role-based access control (RBAC), protected routes, and reusable UI components to improve application security, consistency, and maintainability.
- Optimized frontend performance through lazy loading, code splitting, and efficient component rendering, while collaborating with backend developers to debug issues, review code, and deploy production-ready applications.

Frontend Developer | FloattHR — Softweb-digital *Nov 2025 – Feb 2026*

- Engineered real-time admin and role-listing interfaces using React Hooks and React Query, handling live data fetching, mutations, caching, and optimistic UI updates at scale.
- Built a full Admin Management dashboard covering account lifecycle management: profile editing, role reassignment, and Suspend/Activate status toggling — reducing manual admin overhead.
- Developed a Consultant & Client Oversight module enabling direct assignments, status approvals (Approve/Decline), and request tracking with instant UI feedback.
- Designed a Role-Based Access Control (RBAC) system with full CRUD operations and a searchable permissions interface, enabling granular, scalable platform access control.
- Implemented state synchronization logic ensures the UI reflects consultant un-assignment and status changes instantly without full page reloads, improving perceived performance.
- Collaborated with backend developers to define and validate RESTful API contracts; maintained code quality via Git/GitHub branching strategies and peer code reviews.

PROJECTS

Buyly – E-Commerce Platform | Personal Project

- Designed and built a fully functional e-commerce platform end-to-end, including product catalog, dynamic shopping cart, admin dashboard, and simulated checkout flow.
- Built a real-time shopping cart with quantity control, item removal, and live price recalculation using React state and Context API, requiring zero page refreshes.
- Created an admin dashboard for full product CRUD operations backed by a JSON Server REST API, with instant frontend state updates.

Cryptocurrency Tracker | Personal Project

- Built a real-time cryptocurrency tracker in Vue.js consuming live market data from the CoinGecko public API, displaying price, market cap, and symbol data for hundreds of coins.
- Designed a mobile-first, clean UI with Tailwind CSS, including a coin detail view, dynamic search bar, and currency switcher for instant data comparison.

EDUCATION

Higher National Diploma, Crop Production Technology *2016 – 2022*

Oyo State College of Agriculture and Technology

ADDITIONAL INFORMATION

- Availability: Immediate — open to full-time, contract, and remote roles.
- Languages: English (Fluent), Yoruba (Native).
- Strong written English communication, suited to documenting review decisions and surfacing guideline gaps.
