Profile

Junior Frontend Developer with practical experience building responsive web applications using Vue.js, React.js, and Tailwind CSS. Proficient in developing interactive, user-friendly interfaces and integrating APIs to create smooth, seamless experiences. Recognized for writing clean, maintainable code and contributing effectively in collaborative team environments. Motivated to grow and deliver impact in fast-paced frontend roles.

Skills

Frontend: Vue.js, React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MongoDB

Others: Responsive Web Design, API Integration, CRUD Operations, Basic Testing, Deployment

Backend & APIs: Node.js, Express.js, RESTful APIs

Tools & Platforms: Git, GitHub, Vercel, Postman

Project Experience

Frontend Developer (Project-Based)

🛍️ *Mini-Ecommerce Web App -https://mini-ecommerce-eight-lyart.vercel.app/*

Tech stack: React.js, Tailwind CSS, JSON Server, Render.com, GitHub

- Developed a fully functional mini-ecommerce platform with product catalog, shopping cart, admin panel, and payment simulation.
- Implemented product listing with category filtering, item detail pages, and smooth page navigation using React Router.
- Built a dynamic shopping cart with quantity control, item removal, and real-time price updates using React state and context.
- Designed a clean, mobile-responsive UI using Tailwind CSS, ensuring accessibility and smooth UX on all devices.
- Used JSON Server to simulate a RESTful backend for product management and admin CRUD operations.
- Built an admin dashboard to add, update, and delete products with instant frontend updates.
- Integrated a mock payment process to simulate checkout flow and order handling.

Frontend Developer (Collaborative Project)

🏥 *Hospital Management System —https://hospital-management-omega-one.vercel.app/*

Tech stack: React.js, Node.js, Express, MongoDB, Bootstrap CSS

- Collaborated with a backend developer to build a role-based hospital management system for patients, doctors, and admins.
- Built all frontend views and components using React.js and styled them using Bootstrap for responsive design.
- Integrated with backend APIs to implement user login, appointment scheduling, and admin dashboards.

- Created forms and UI logic for booking, user role switching, and conditional rendering based on JWT-authenticated routes.
- Worked with Git and GitHub for source control and team collaboration, handling code merging and frontend deployment.

Frontend Developer
💹 *Crypto Tracker App —https://crypto-tracker-sigma-lyart.vercel.app/*
Tech stack: Vue.js, Axios, Tailwind CSS, CoinGecko API

- Built a responsive cryptocurrency tracker using Vue.js, fetching real-time market data from the CoinGecko API.
- Implemented a dynamic search bar and coin filtering functionality for quick access to price, market cap, and symbol data.
- Styled the interface using Tailwind CSS, with a mobile-first layout and clean visual presentation of coins and prices.
- Created a coin detail view showing additional stats and price updates, accessible via click navigation from the main grid.
- Integrated a currency switcher and refresh button to update displayed data without reloading the page.

Certificates

Software Development Bootcamp
SQI College of ICT
January,2025

Interests

Passionate about frontend development and growth in modern web technologies
Motivated by a love for building sleek, responsive user interfaces using Vue.js and React.js. Actively exploring tools like Next.js and TypeScript to expand capabilities. Thrives in remote or startup environments focused on product delivery and continuous learning.

Availability

Open to freelance gigs, part-time roles, and full-time junior frontend developer opportunities. Available for immediate remote collaboration on short- or long-term projects.
