EXPERIENCE

Front End Developer

- **Mini E-Commerce Website (Self-Initiated Projects)**
- Built a fully functional e-commerce interface using **React** and **Bootstrap**, including product listings, cart functionality, and checkout flow.

  Integrated with a Node.js backend to handle product data and simulate order processing.

  Focused on performance, component reuse, and responsive design across devices.
- **Healthcare Management System** *(Collaborative Project)*
- Developed the frontend using **React** and **Bootstrap** to manage patient records, appointments, and billing.

  Collaborated with backend developers using **Node.js** and **MongoDB**, integrating secure APIs and handling dynamic data.

  Ensured smooth UX with component-based architecture, form handling, and user feedback.
- **Weather App**
- Designed a responsive weather application using **Bootstrap** and **JavaScript**, leveraging a public weather API.
  Implemented dynamic search, temperature display, and icon-based weather visuals.
- **Mini Budget App**
- Created a budgeting tool using **JavaScript** and **Bootstrap**, allowing users to input income/expenses and view summaries.
  Built logic for real-time budget calculations and a clean, interactive UI.
