Moyinoluwa Adigun | Frontend Developer

Email address: moyinoluwaadigun390@gmail.com
Web: https://adigun-moyinoluwa-portfolio.vercel.app/

Profile

As a dedicated Frontend Developer, I specialize in crafting responsive and user-focused web applications using React.js, Vue.js, and modern CSS frameworks. My experience includes building interactive interfaces and integrating APIs, which improves usability and performance. I thrive in both solo and team environments, writing maintainable code and quickly adapting to new tools. I am eager to contribute to dynamic teams and advance in frontend development roles, bringing innovative solutions and a collaborative spirit.

Project experience

Frontend Developer (Project-Based)
Online Market Demo
Tech stack: React.js, Tailwind CSS, JSON Server, Render.com, GitHub
•Developed a fully functional mini-ecommerce platform with product catalog, shopping cart,
admin panel, and payment simulation.
•Implemented product listing with category filtering, item detail pages, and smooth page
navigation using React Router.
•Built a dynamic shopping cart with quantity control, item removal, and real-time price updates
using React state and context.
•Designed a clean, mobile-responsive UI using Tailwind CSS, ensuring accessibility and smooth
UX on all devices.
•Used JSON Server to simulate a RESTful backend for product management and admin CRUD
operations.
•Built an admin dashboard to add, update, and delete products with instant frontend updates.
•Integrated a mock payment process to simulate checkout flow and order handling.

Frontend Developer (Collaborative Project)
Healthcare Management System
Tech stack : React.js, Bootstrap, Node.js

- Collaborated with a backend developer to build a role-based hospital management system for patients, doctors, and admins, improving healthcare management efficiency.
- Built all frontend views and components using React.js and styled them using Bootstrap for responsive design, enhancing user interaction across devices.
- Integrated with backend APIs to implement user login, appointment scheduling, and admin dashboards, streamlining healthcare operations.
- Created forms and UI logic for booking, user role switching, and conditional rendering based on JWT-authenticated routes, ensuring secure and personalized user experiences.
- Worked with Git and GitHub for source control and team collaboration, handling code merging and frontend deployment, which facilitated smooth project progression.

Project experience

Frontend Developer
Crypto Tracker Web App
Tech stack: Vue.js, Axios, Tailwind CSS, CoinGecko API

- Built a responsive cryptocurrency tracker using Vue.js, fetching real-time market data from the CoinGecko API.
- Implemented a dynamic search bar and coin filtering functionality for quick access to price, market cap, and symbol data.
- Styled the interface using Tailwind CSS, with a mobile-first layout and clean visual presentation of coins and prices.
- Created a coin detail view showing additional stats and price updates, accessible via click navigation from the main grid.
- Integrated a currency switcher and refresh button to update displayed data without reloading the page.

Skills

– FRONTEND DEVELOPMENT

Vue.js, React.js,
JavaScript, HTML5, CSS3,
Tailwind CSS, Bootstrap

– BACKEND & API

Node.js, Express.js,
RESTful APIs

Tools & Platforms: Git,
GitHub, Vercel, Postman

Certification

03/2023 – present

Software Development
SQI College of ICT
