MOYINOLUWA DEBORAH ADIGUN

Frontend Developer | React.js

moyinoluwaadigun390@gmail.com | github.com/DevMoyin17 | adigun-moyinoluwa-portfolio.vercel.app | Lagos, Nigeria | Open to Remote

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience designing and shipping production-grade web applications using React.js, Vue.js, and Tailwind CSS. Specialized in building role-based access control (RBAC) systems, real-time dashboards, and API-driven interfaces that are fully responsive and cross-browser compatible. Consistently delivers performant, maintainable code. Reducing page load times by 50% on recent projects. Comfortable working independently and within agile teams; experienced in defining API contracts with backend developers, conducting peer code reviews, and deploying via Vercel and GitHub. Seeking impactful frontend roles at growth-stage startups or tech-forward organizations, including remote opportunities.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js (Hooks, Context API, React Router), Vue.js

Styling: Tailwind CSS, Bootstrap, Responsive Web Design

State & Data Fetching: React Query, React Context API

Backend & APIs: RESTful API Integration, Node.js, Express.js, JSON Server

Tools & Platforms: Git, GitHub, Vercel, Postman, VS Code

Auth & Security: JWT Authentication, Route Guards, Conditional Rendering

Practices: Agile/Scrum, Code Reviews, Version Control, RBAC Architecture, Mobile-First Design

KEY ACHIEVEMENTS

- Reduced page load time by 50% using React Query for efficient data fetching, caching, and state synchronization, eliminating redundant API calls.
- Delivered 100% responsive design scores across multiple projects (Buyly, Crypto Tracker) using Tailwind CSS and Bootstrap, ensuring seamless UX on all screen sizes.
- Engineered 10+ production-ready feature modules, including automated consultant assignment logic and a searchable RBAC permissions interface.
- Architected and shipped a full-featured e-commerce platform (Buyly) with cart management, admin panel, category filtering, and mock payment integration independently, from design to deployment.

PROFESSIONAL EXPERIENCE

Frontend Developer | *FloattHR — Softweb-digital*

Lagos, Nigeria

Nov 2025 – Feb 2026

- Engineered real-time admin and role-listing interfaces using React Hooks and React Query, handling live data fetching, mutations, caching, and optimistic UI updates at scale.
- Built a full Admin Management dashboard covering account lifecycle management: profile editing, role reassignment, and Suspend/Activate status toggling — reducing manual admin overhead.
- Developed a Consultant & Client Oversight module enabling direct assignments, status approvals (Approve/Decline), and request tracking with instant UI feedback.
- Architected a Role-Based Access Control (RBAC) system with full CRUD operations and a searchable permissions interface, enabling granular, scalable platform access control.
- Implemented state synchronization logic ensuring the UI reflects consultant un-assignment and status changes instantly without full page reloads. improving perceived performance.

- Collaborated with backend developers to define and validate RESTful API contracts; maintained code quality via Git/GitHub branching strategies and peer code reviews.

Frontend Developer | *Buyly E-Commerce Platform — Personal Project*

Sep 2024 – Dec 2024

- Designed and built a fully functional e-commerce platform end-to-end, including product catalog, dynamic shopping cart, admin dashboard, and simulated checkout flow.
- Implemented category-based product filtering, item detail pages, and client-side navigation with React Router, improving product discoverability and UX.
- Built a real-time shopping cart with quantity control, item removal, and live price recalculation using React state and Context API Requiring zero page refreshes.
- Created an admin dashboard for full product CRUD operations (add, edit, delete) backed by a JSON Server REST API, with instant frontend state updates.
- Achieved a fully mobile-responsive layout using Tailwind CSS utility classes, delivering consistent UX across all device breakpoints.

Frontend Developer | *Healthcare Management System — Collaborative Team*

Jun 2024 – December 2025

- Co-built a role-based healthcare platform serving patients, doctors, and admins, consolidating appointment scheduling, user management, and reporting into one system.
- Developed all frontend views and components in React.js, styled with Bootstrap for responsive cross-device compatibility. Reducing UI inconsistency across user roles.
- Integrated backend APIs for user authentication (JWT), appointment booking, role-based routing, and admin dashboards, delivering a secure and personalized user experience.
- Implemented conditional rendering and protected route logic based on JWT-authenticated sessions, ensuring users only access role-appropriate content.
- Managed feature integration and deployment pipeline via Git/GitHub, including branching, code merging, and peer review workflows.

Frontend Developer | *Cryptocurrency Tracker — Personal Project*

Jul 2025 – Aug 2025

- Built a real-time cryptocurrency tracker in Vue.js consuming live market data from the CoinGecko public API, displaying price, market cap, and symbol data for hundreds of coins.
- Implemented a dynamic search bar and coin filtering system, enabling users to instantly query and compare specific assets.
- Designed a mobile-first, clean UI with Tailwind CSS; created a coin detail view with extended stats accessible via click navigation from the main grid.
- Added a currency switcher and in-page data refresh control — keeping displayed data current without full page reloads, improving usability and perceived speed.

EDUCATION

Higher National Diploma, Crop Production Technology 2016 – 2022

Oyo State College of Agriculture and Technology

Igboora, Oyo State, Nigeria
